

## MIXING MACHINE (AD-34)

### General Characteristics

<b>Model</b>	AD-34
<b>Construction</b>	Reinforced Carbon Steel
<b>Lenghts</b>	5200 – 6800 mm
<b>Useful Mixing Lenght</b>	2500 – 3700 mm

### Advantages

The double shafts mixer is designed for the correct Homogenization of the mixture of different materials and water.

The versatility lies in the incorporation of adjustable blades, which ensure an optimum advance of material for each product, and a design of transmission that confers a speed suitable to the quality of material required.

Mixing shafts. with variable orientation blades, to achieve a perfect mixing with any type of material.

Support of the shaft on spherical bearings, carrying axial shafts on the head to avoid the bending of the shafts

### Application Sectors

**Mining**  
**Ceramic**  
**Bulk Materials**

### CE Normative

This partly completed machine is in compliance with the following relevant provisions of the EC Directives: 2004/108/EC (EMC Directive).

The protection objectives of the Low Voltage Directive 2006/95/EC are in accordance with Annex I, No. 1.5.1 of the EC Machinery Directive 2006/42/EC.

The following standards have also been applied:

EN ISO 12100-1:2003.

EN ISO 12100-2:2003.

EN ISO 13857:2008.

And EN 619:2002.
